

## Nomination Date Is Changed Here

Date of Edmonton provincial convention has been changed to Saturday, July 15. It was announced here Friday morning.

The meet will be held in Social Credit Hall, 974 Jasper avenue, starting at 8 p.m. Premier Ernest Manning will attend.

The convention had been planned for July 14, but due to unforeseen circumstances, it has been moved ahead one day.

## Report Von Papen "Speaks of 'Peace'"

BERLIN, June 30.—(AP)—The Geneva Tribune published yesterday "with complete reserve" a dispatch dated Vichy relating that Franz Von Papen, Nazi envoy to Turkey, recently had stopped in Paris and talked with Pierre Laval who was instructed to make compromise peace soundings. It said Von Papen had stopped at Paris after a visit in Spain.

## British Tanks Broaden Hold Across Odon

Continued from Page One  
31st Highland Division fighting in France.

NEARING AIRFIELD The assault is pressing over the valley to the east within half a mile of one of the city's main airfields. It was revealed that a strong anchor was strengthened greatly by the broadening of the front.

It now can be disclosed that advanced elements of the Odon appeared at one time were cut off from the rear by counter-battalions against the sides of the salient but the Nazi wedges were wiped out.

Radio Paris said British and Canadian troops had made new landings across the Odon estuary and captured the coastal town of Caen, 12 miles southeast of Caen, but the report was not confirmed by any Allied source.

Previous Berlin broadcasts had reported the repulse of Allied landing attempts in the same area.

ADMIT WIDENING The German high command reported that the Allies captured a "significant effect" in the Odon from the southwest, and acknowledged that they were "able to widen" a breach in their fighting.

The same time claiming that German counter-attacks recaptured a large part of the lost ground.

(A Berlin broadcast recorded by CBS said an Allied landing fleet of more than 30 ships, including warships, freighters and landing vessels, was anchored in the Arne estuary and was being pounded by German coastal batteries. Sixteen landing vessels attempted to put troops ashore but were repulsed early on Thursday morning, but were driven off by shells. The broadcast was quoted as saying.)

HINT ISLAND ATTACK Nazi broadcasts also hinted that Allied naval forces attempted to seize the Channel Islands off the coast of France and were being repulsed by the German U-boat fleet and coastal batteries. German U-boats, including one feint by six destroyers, and motor torpedo boats also threatened by coastal fire, DNB said.

The Germans hurried from the fighting in the southwest of Caen in a futile attempt to wipe out the British breakthrough across the Odon, but there was no confirmation of reports the enemy had launched a major counter-offensive.

Limited enemy forces thrust four times against the British western flank in the Graville-Bretteville-les-Cloville area on the north bank of the Odon, but they were repulsed with heavy and costly losses when met by heavy and accurate British fire.

WATERS Military and Press: "The German U-boat fleet and coastal batteries. Sixteen landing vessels attempted to put troops ashore but were repulsed early on Thursday morning, but were driven off by shells. The broadcast was quoted as saying.)

## Russian Drive Nearing Great Base of Minsk

Continued from Page One  
which the remnants of Napoleon's great army drowned and Napoleon's army was "scattered."

"More than 100 years later, the waters of the Minsk are being engulfed thousands of corpses of the doubly-inglorious German conquerors."

DRIVING FOR GAP Rokossovsky's forces also were pursuing the Germans westward toward the Baranovitch 250, 75 miles southwest of Minsk and an ancient fortress of the Polish plains and Warsaw. At last reports, the Russians were driving over the approaches to Slonk 40 miles east of Baranovitch.

On the northeastern approaches to Minsk, Gen. Ivan D. Chernykhov's 3rd White Russian Army, rolling down the main Moscow-Minsk-Warsaw, reached the Baranovitch 250, 75 miles southwest of Minsk and an ancient fortress of the Polish plains and Warsaw. At last reports, the Russians were driving over the approaches to Slonk 40 miles east of Baranovitch.

## Two in Hospital With Injuries After Accidents

Four persons were injured in traffic accidents Thursday, and early Friday two of the injured were in hospital. Two of the accidents occurred on the side of a government truck at 104 avenue and 101 street. He was taken to Royal Alexandra hospital for medical attention.

Sgt. Ken North, R.C.A.P. No. 2 A.O.S. and Sgt. Bob Crook, U.S. A.A.P., American Air Base, received slight injuries after being knocked out of an auto when it hit the ground, at 104 street, and Kingsway about 12:40 a.m. The first-named was hit by city police who had been placed in No. 2 A.O.S. hospital, while the other was taken to his base. Extent of their injuries was not known by police.

FIRST SAW BICYCLES According to police, the government truck operated by Sp. W. Schreiner, No. 13 Engineer's Company, Prince of Wales Army, had been stopped to turn a right-angle intersection of 101 street and 104 avenue when two boys on their bicycles were noticed.

The driver stopped the truck when he saw that the boys had not seen him. Lefton Low rode his wheel into the running board, which was hit by Constable George E. Greffe, R.C.M.P. officer, who was passing at the time, the boy was pushed to hospital.

Interviewed by police at that institution, the youth stated he did not see the truck approaching, but before he ran into it. He and his companion were riding north on 101 street at the time of the accident.

According to investigators, the two women were riding along with another American officer, in the auto driven by Arnold E. Baroni, Leland. The driver stated he saw the truck approaching, but before he ran into it. He and his companion were riding north on 101 street at the time of the accident.

The impact swung the first auto around, knocking two of the three passengers out of the vehicle and onto the ground. Four other members of the R.C.A.P. from No. 2 A.O.S. passengers in the truck were uninjured. Name of the third person was not known to the driver.

Sgt. North and Sgt. Crook were removed from the scene of the accident before the arrival of the ambulance. It was stated that the men's injuries were not serious; they were understood to be not permanent.

A second accident between a cyclist and an auto occurred about 1:20 p.m. Thursday, near Marine Lundell, 8520 106 street, ran into the side of an auto operated by Michael Szezechuk, 1196 43 street.

After striking the car, she fell from the bicycle to the pavement, and received a cut on her right arm. City police were told by Szezechuk, who stated the woman's bicycle appeared to have gone out of control. She told him she had not been able to make her brakes work and was unable to avoid the accident, he said.

# The Bulletin's SPORTS SHOW by Hal Dean

JULY 1st sports day in Edmonton came a war casualty this year. The annual Dominion Day celebration at South Side Athletic Grounds, which came to be looked upon as more or less of an institution in this city, is listed among the missing and probably will remain there for the duration.

In 1943, South Side Businessmen Association sponsored an all-star service track and field meet but most of the other features which usually went with the annual affair were dropped in 1944. This year no activities are contemplated by that organization.

Biggest event from a spectator standpoint will be the benefit baseball game between the All-Stars and Yanks at Renfrew Park commencing at 6:30 p.m. and which is sponsored by the C.P. Airline Chapter, I.O.D.E. Many of the city's bowling enthusiasts will be taking part in the annual tournament of the Edmonton Lawn Bowling Club. Golf, tennis and football will also claim their share of attention.

**WHY ALL THE WORRY?**

JUST why there should be such a concerted effort on the part of a few individuals not directly concerned and it is quite clear John Ducey is not one of them is rather smokes over the question of umpiring in the Senior Baseball League is rather hard to understand.

That John Ducey is a capable umpire, no one will deny, but he does not care to handle games.

## Enlisted Men Beaten 5-3

## Two Runs in Last Inning Give Centrals Fastball Win

Central Aerolines scored two runs in the last of the ninth Thursday night to break a 3-3 deadlock and overcome the U.S.A.F. Enlisted Men 5-3 in the Senior Men's Fastball League fixture at Kingsway Park. The girls' contest between C.P. Airlines and South Side Athletics was washed out when the latter failed to field a team.

The Enlisted Men were leading 3-0 in the fifth inning, scoring two runs in the second and one in the fifth, but the Centrals counted one in the sixth and added two in the next frame and then went to win with two in the last.

A pair of errors, two singles, a passed ball and a pitch enabled Al Clay and Jerry Johnson to score the tying markers in the seventh and three hits and a wild pitch in the ninth sent Lou Green and Clay under the sacks to win the game.

Following is the box score:

Enlisted Men	AB	R	H	PO	A
Clay, 3b	4	1	2	2	0
Pugars, 2b	3	0	1	2	2
Baldwin, 1b	3	0	0	0	0
Burns, 3b	3	0	0	0	0
Minnow, 2b	3	0	0	0	0
Honing, 1b	4	1	1	0	0
Hayden, 3b	4	0	0	0	0
Brooks, 1b	4	0	1	0	0
Derocis, 2b	3	0	0	0	0
Vinson, 3b	3	1	0	0	1
Totals	31	3	5	9	3

**Score by innings:**  
1st. Enlisted Men 0-0; 2nd. 0-2; 3rd. Centrals 0-0; 4th. 0-0; 5th. 3-0; 6th. 0-0; 7th. 3-3; 8th. 3-3; 9th. 5-3.  
Umpire—George Ray; and—Alvin Bile.

**Tommy's game—C.P. Airline vs. Walk-Size 'A'.** Aircraft Engineers vs. U.S. Officers. Sunday's game—2nd. Centrals Aerolines vs. Menace. Aircraft pair vs. U.S.A.F. Enlisted Men.

## 10-Round Verdict To Manual Ortiz

BOSTON, June 30.—(AP)—After getting under way slowly, Manuel Ortiz, 125½, of El Centro, Calif., world bantamweight champion, closed with a furious rush to gain a 10-round decision over Larry Boland, 125½, of Providence, R.I., last night in a non-title boxing bout at Braves Field.

Ortiz landed a right hand to Boland's chin in the eighth round, and a left to the body in the ninth. Boland was hurt and did not fight back.

Ortiz was the aggressor throughout the fight, and his punches were the more effective. Boland was the more defensive.

Ortiz was the aggressor throughout the fight, and his punches were the more effective. Boland was the more defensive.

EVERY TIME YOU'RE AWAY ON A SUPERMAN'S SERVICE FOR SERVICE MEN MISSION, THE MAIL PILES UP.

SOLDIERING IS A SERIOUS TRADE. FOR WAR IS A GRIM BUSINESS—BUT IT HAS ITS LIGHTER SIDE TOO. WITNESS THE CASE OF PRIVATE MIKE BOLTON...

...AND I APPRECIATE YOUR SORTING IT, LOIS.

THAT PARTICULAR LETTER GETS TOP PRIORITY. IT'S SHORT, TERSE AND PROVOCATIVE.

THAT IT IS, ALL IT CONTAINS IS THE BOY'S NAME AND CAMP, AND THE MESSAGE: DEAR SUPER: COME AT ONCE I NEED YOU, BUT A D'D?

SO GO!

SO YOU GO?

THE INCREDIBLE MAN OF TOMORROW ZOOMS THROUGH THE SKY LIKE A BAZOOKA PROJECTILE, AND IN AN AMAZINGLY SHORT TIME...

BENEATH ME, THE CAMP IN QUESTION NOW TO LOCATE MY MAN?

PRIVATE BOLTON'S HE'S OFF A MAJOR DUTY RIGHT NOW. SUPERMAN, WHICH MEANS YOU'LL PROBABLY FIND HIM OFF BY HIMSELF WITH A BOTTLE OF LINIMENT.

THANKS, I'LL LOOK.

MIKE BOLTON, I PRESUME I'VE TRACED YOU BY THE ODOR OF OIL OF WINTERGREEN.

NICE I SEE... BUT I DON'T THINK YOU'RE HERE IN TIME TO SAVE MY LIFE.

AS BAD AS THAT? WHAT'S THE TROUBLE?

HORSES.

I'M BORN ON THE LOWER EAST SIDE IN NEW YORK, AND THE ONLY HORSE I EVER SEE IS PULLING A NICE WAGON SO WHAT DOES THE ARMY DO WITH ME? THEY OUTME IN THE CAVALRY!!!

BUT THE HORSE IS KNOWN AS MAN'S BEST FRIEND? MIKE?

ARE YOU KIDDIN'? THEY ISSUE ME A G.I. STEED NAMED DEVIL—WHICH GIVES YA A IDEA I WANTCHA T-TAKE A GANDER AT THE BEAST.

GLADLY I'VE BEEN FOND OF HORSES.

BUT AS SUPERMAN COMPLETELY OFF GUARD, ENTERS DEVIL'S STALL...

SEE WHAT I MEAN? I SEE WHAT AN BEAR IN MIND THAT YOU MEAN! AND NOW THAT THAT YOU'RE SUPERMAN, I THINK HAS PUT ON A PERSONAL BASIS I THINK AND HE AND I ARE GOING TO HAVE SOME LESSONS!

### Quash Conviction In Supreme Court

Appeals against convictions on charges of failing to produce his national registration card, and obstructing two R.C.M.P. constables in the performance of their duty brought by Nick Maynard, Black Loan Scheme, near Prins, were successful in supreme court chambers Thursday.

On the charge of failing to produce his national registration card, Magistrate A. A. Tull imposed a fine of \$10 and costs, and on the obstructing charge a sentence of three months was imposed.

Mr. Justice T. M. Tweedie, sitting in supreme court chambers, ordered the two convictions quashed, and the appeal that the fine paid by the defendant be remitted.

### On Bench

Magistrate Harold L. Howe, K.C., who will occupy the bench in the city court building for the next three weeks during the absence of Magistrate A. L. Miller, K.C.

### Alberta Ready To Invest Million In House Plan

A proposed government-sponsored housing program, in which the province is willing to invest \$1,000,000 was announced in Calgary Friday by Mr. Lucien Maynard, K.C., attorney-general, in an address before the 1944 convention of the Union of Alberta Municipalities.

The plan embraces a province-wide home-building association, and municipal corporations will be invited to subscribe for shares, along with the government.

Persons desirous of building a home in municipalities that have subscribed, would be able to borrow money from the association for the purpose. Interest rate on such loans would not exceed four per cent.

Following is the proposed program, as outlined by Mr. Maynard:

1. A province-wide home building association will be formed under part one of the Building Act, in which municipal corporations will be invited to subscribe for shares along with the government.
2. All shares purchased by municipal corporations and the government will be held in trust, yielding no dividends or interest.
3. Voting rights in the association will be based on the number of non-profit and interest-free shares issued.
4. In addition to purchasing shares in the association, it is proposed that the government and municipal corporations should purchase debentures in the association carrying a rate of interest of three per cent. All interest payments on debentures purchased by municipal corporations will be guaranteed by the government.
5. The amount subscribed for shares by the debentures, and the municipal corporations will constitute a revolving fund which will be available to the association for the purpose of new loans and interest-free advances at a rate of interest not exceeding four per cent.
6. The general public, associations, and corporations will be invited to subscribe for shares and purchase debentures, with a maximum dividend of five per cent on the shares so issued.
7. Money obtained by the association from the subscription for shares and the purchase of debentures will be made available to the public for home building—purposes at a rate of interest not exceeding four per cent.

**LOANS AVAILABLE**

8. Loans made by the association will be available to the rural and urban home owners living in the municipal corporations which have joined the association.
9. Provision will be made for the purchase of land where, in the event of the death of the borrower before he has completed his mortgage, his family will receive a loan.

### Ends Course City Is Ready To Celebrate Dominion Day

Ideal weather is in prospect for the Dominion Day celebrations, and Edmontonians are planning a grand program for the celebration of the founding of the Dominion.

Many planning trips to lake resorts, while thousands are taking advantage of the long week-end to water on weeds in their ponds to a little cultivation of their lawns and vegetable gardens.

A splendid program of sports events is listed, with baseball games scheduled for Saturday and Sunday on both Saturday and Sunday.

The Saturday game is an all-star event in which the pick of the players in the baseball league will oppose the U.S. Army Stars. This match is sponsored by the Earl of Chester, Canada, and the I.O.D.F. proceeds will be devoted to war charities. On Sunday a regular league game is scheduled.

**MANY PICNICS**

Many sports and picnic parties are scheduled to be held at Borden and other picnic grounds. In addition to the school clubs, fraternal organizations and groups of families participate in the celebrations.

Shorlage of supply of fireworks will dampen somewhat the children's delight, the evening display of fireworks being one of the regular features of previous seasons.

In addition to the regular fireworks to be played at Redfern Park there will be the ball game at Kingsway. The traditional South Edmonton Business Men's race meet will be held this year because of war conditions.

**GOOD WEATHER**

The first of July apparently is in the air, and the weather is what we wish to do. The day is bright and warm, and Saturday is "fair and warm."

The maximum temperature yesterday was 68 degrees, and the minimum 33 degrees and the overnight low 49 degrees. The 8:30 a.m. forecast was "degree."

### Clear Title to the Home Without Any Further Obligation

10. The board of directors of the association will formulate the conditions under which loans will be made, provide technical personnel to advise the association and supervise the work of building, submit progress reports on buildings to be erected and generally by the nature of the security to be taken for each loan.

11. The administration of the association will be under joint control of the government and municipal corporations, with the non-profit motive attached, will serve to reduce the financial overhead operations.

12. In order to launch the program the association is prepared to make available a minimum of one million dollars, five hundred thousand dollars of which will be invested in interest-free and dividend-free shares.

"It is because the need is urgent and immediate that the government has been giving thought to an elaborate housing program. Mr. Maynard told the convention.

He pointed out that the amount of money to be derived from each share, and the interest-free advances available to the prospective home-owners would bear a direct ratio to the amount subscribed by the municipal body in the form of shares or debentures.

### Employees Succeed In Court Action Here

Two former employees of Metcalf-Hamilton-Kansas City Bridge Co. successfully sued the company in supreme court, being awarded \$825 and \$411 for back pay, standing time and transportation costs incurred. Judgment in the case was given by Mr. Justice R. J. Sheppard.

In giving judgment against the company, he said that all elements of the dispute between the employees and the company had been settled at the company's head office here. The chief cause of the dispute, he added, was that the employees, clothed with brief authority at Fairbanks, Alaska, acted in a very high-handed manner in dealing with the claims of the two litigants.

### AB. Douglas Townson City Sailor Helps to Save Friend in D-Day Attack

Aboard the Infantry Landing Craft H.M.C.S. Prince Henry, Able Seaman Douglas Townson, R.C.N., son of Mr. and Mrs. Ernest Townson of 10118 107 avenue, Edmonton, is credited with playing a major role in saving the life of a wounded member of his crew during the landing operations on D-Day.

Under heavy enemy fire, Townson, another companion, Able Seaman Herbert Smith of Iloc, B.C., scooped a foxhole for Able Seaman Stewart McQueen of London, Ont., in the sand of the beach after their boat had been hit, and then found medical aid for him.

Although McQueen could not swim, he added a touch of comedy to what might have been tragic circumstances, by beating the others a laugh and a cheer with another man in tow. This craft in turn was sunk and the three transferred to a third ship for passage back to Prince Henry.

McQueen's story begins on the Normandy beaches. Just after the invasion started, his assault craft was hit by a mortar shell and the two companions he stood defenceless amidst shrapnel from mortar fire, sniper bullets and the cross fire of machine gun emplacements.

"Swim to the nearest landing craft," a beach official ordered. "Get off this beach."

"I can't swim," said Seaman McQueen. "Not a stroke."

"Swim or die. It's your baby," said the official.

McQueen floundered into the water. When it reached his chest he started to thrash arms and legs. A mortar shell whizzed overhead. "Hey, chum," he shouted, "I can't swim. I'm going to hang on to you."

McQueen swears he doesn't remember what happened after that. But his companions, Able Seaman Townson, of Edmonton, and Able Seaman Herbert Smith of Vancouver, gave a glowing account of his newly-found swimming powers.

"He was swimming freely in the water," McQueen said. "I took him by the arm and pulled him out of the water."

Seven applications for naturalization were heard by His Honor Judge J. D. Matheson in district court Friday. Two of the applications were refused on the ground that the applicants were former residents of enemy countries.

### Alberta Motor Association

Let's drive more carefully and let more people live in good health.

### Please Slow Down—Be a Life Saver!

Better not take chances on the streets and highways this holiday season. Use caution and consideration in your driving. Let's drive more carefully and let more people live in good health.

**ROAD REPORTS**

There have been no general rains in the province for the past 24 hours and the probabilities are continued dry weather. Between Edmonton and Crossfield detours are required in dry weather otherwise travel is recommended on gravelled roads by signs and flags. Between Crossfield and Dryden detours are required on gravelled roads.

The ferry at Smith's is now operating for all traffic. The ban is off all highways for trucks and buses except on Highway Number 16, between Wildwood and Edson. The road between Rossington and Freedom on Highway Number 16 is still impassable. The ferry is not yet in operation at Langdon for motor vehicles.

### Five Utilities Pay \$483,859.67 Into Treasury

A total of \$483,859.67 was poured into the city treasury in taxes and net surpluses from the five city-owned utilities during the five-month period ended May 31, 1944. This is the equivalent of nine mills at the current taxation rate, according to a report filed Friday with the city commissioners by the city controller's department.

This is an increase of \$2,069,950 over the \$481,789.72 derived from these sources in the first five months of 1943.

Gross revenue from the utilities during the 1944 five-month period amounted to \$1,181,253.22 compared with \$2,560,603.17 for the same period last year, an increase of \$467,822.06.

Expenditures for the 1944 period amounted to \$1,724,455.33 compared with \$1,676,463.50 an increase of \$2,568.83. This leaves a surplus on operation of \$1,393,378.39 compared with \$1,248,233.67 for the same period of 1943.

During the 1944 period \$630,196.29 was placed in the renewal reserve account compared with \$503,585.23, an increase of \$126,611.06.

Taxes paid to the city amounted to \$369,895.49 during the 1944 period compared with \$274,133.17 in the same period last year, while surplus accrued during the five months of this year amounted to \$143,330.39 against \$185,657.45 for the five months of 1943.

Members of the "Company South Edmonton Battalion Veterans' Volunteer Reserve will parade at Benson school at 7:30 p.m. Friday for target practice.

## DOROTHY DIX SAYS—

Young People Rebel  
At Old Ideas, Modes

Much Friction Is Caused by Parents Refusing to Admit  
That Life is Speeded Up and That Teen  
Agers Must Grow Up

One of the reasons there is so much friction between parents and children is because the fathers and mothers are trying to force out-moded manners and customs upon them and the youngsters rebel. They refuse to conform to a schedule that is 25 or 30 years behind the times, as there is fighting all along the home front.

It is not the principle of the things that the children wish to do to which their parents object. It is whether they wish to do things themselves or not. For instance, in many households whenever a youngster will use a

Today's Needlework  
by ALICE BROOKS

little hip stick Mother asks if she has committed a mortal sin, and every time John drives an automobile at over 35 miles an hour Father prophesies that he is hurtling toward death. This is not because Mother really believes that there is anything intrinsically demoralizing in a dab of colored grease, or Father thinks that there is anything wrong in a little speed, but because when Mother was a girl, ladies didn't use cosmetics, and Father's only means of transportation was a horse.

Yet while Father and Mother are so distressed they can't force their children to dress and act as they did over a quarter of a century ago, you don't see them following along in the patterns of their youth. Father doesn't wear stiff collars as he went, and Mother doesn't drape herself up in long skirts and ensembles. Nor have they taken their seats by the fire-side to wait for their later end.

YOUTH'S APPAREL  
Now, admittedly, they wear the latest up-to-the-minute clothes and they step out at night as if they were in the patterns of their youth. But they are scandalized by the children and John's tails and dirty shoes and their not wanting to go to bed with the children, because they never did that when they were boys and girls.

One of the causes that make the home with teenagers in it a perpetual battle ground is the "keeping company" problem. According to Mom and Pop, there is no serious interest in the opposite sex when they were mature men and women. They indulged in little of the calf-love stuff. So when little Miss Tommy began stepping out, they do it practically over their parents' dead bodies.

Now, admittedly, the date line has been moved up considerably of late years, but so have the manners. The boys and girls in their teens are just as much interested in the opposite sex as their parents were at 20. And fathers and mothers are just as much interested in the opposite sex as their children are. They just recognize that as a fact, and having a row for every time their boy friends come around.

Whether it be it or not, our children are modern. They are having a row for every time their boy friends come around. They are having a row for every time their boy friends come around. They are having a row for every time their boy friends come around.

Personal Health Service

Your Baby  
And Mine

By MYRTLE MEYER ELDRON  
One of the important things in preventing children from suffering any intestinal ailments during the summer, is meticulous care of the food they eat.

This care begins the moment food is brought into the house. Fresh fruit should be washed well and kept on ice. Vegetables should be thoroughly cleaned (the refrigerator is the refrigerator designated for this). Cereals should be examined for insects. All meats, poultry, and bread and cake should be kept in a cool box. In hot weather, bread can be safely stored in the ice-box and will stay fresh indefinitely.

Any combination of cooked milk and egg should be eaten the day it is made and if it must be kept for more than a day, keep it in a cool box. Refrigerate it rapidly in ice and milk mixtures. So baby's curd and custard for one day in the icebox and no longer and this goes for custard puddings, and similar mixtures.

Milk should be handled with a prima donna. For the baby it may be either canned or fresh. But if it is to be used for anything but the baby, it should be kept for three minutes on the stove, stirring constantly. This will kill the bacteria. This is a simple safeguard in hot weather. After boiling, strain and serve in a glass on ice. Cream will hold water around it until it is cold. Put in the coldest part of the refrigerator until ready to use for the baby. Never warm baby's milk in a glass. It should be heated in a bottle.

There is no secret to good health during the summer. It means constant vigilance toward foods. No stuffing or eating of unusual quantities of food. Feeding when the child doesn't want them. Let of cool water inside and plenty of warm and cool water. Let of cool water inside and plenty of warm and cool water. Let of cool water inside and plenty of warm and cool water.

Our fad diet. During the summer months, it is suggested that the method of being cool and well. It is suggested that the method of being cool and well. It is suggested that the method of being cool and well. It is suggested that the method of being cool and well.

## Debunker

By GAYNOR MADDOX

One of the most widespread fallacies is the idea that the jungles of Africa and Asia are teeming with animal life, such as elephants, lions, tigers, and especially snakes. The Debunker having spent three years in Africa, and having traveled in the most dense jungles, found that there were actually very few animals of any kind there, and in three years only saw two snakes. Jungle animals are there, they are there, even when they are there; with animal life, such as elephants, lions, tigers, and especially snakes.

One of the most widespread fallacies is the idea that the jungles of Africa and Asia are teeming with animal life, such as elephants, lions, tigers, and especially snakes. The Debunker having spent three years in Africa, and having traveled in the most dense jungles, found that there were actually very few animals of any kind there, and in three years only saw two snakes. Jungle animals are there, they are there, even when they are there; with animal life, such as elephants, lions, tigers, and especially snakes.

*"Color and Fantasy" Fashion Parade Rehearsals are Held*

**BY KEY FORD**

With a great deal of holding of breath and squeaking, girls of Edmond's Junior High School are being guided by Ginger Rogers in the picture "Lady in the Dark," at the dress rehearsal Thursday of the fashion show which will take place in the Empire room of the Hudson's Bay Company store on Monday, July 3rd 3 p.m. and at 8 p.m., and on Tuesday, July 4th at 8 p.m.

Sponsored by the Junior Hospital League of Edmond, the show will

The display, "Color and Fantasy" is a Dorothy Gray production. Miss Margaret Clark is in charge of arrangements and will be the official commentator.

Mrs. Walter Lalgie and Mrs. L. D. Lalgie are convenors for the League.

The models include: Mrs. J. Charlesworth, Mrs. John H. Spivey, Mrs. Wm. C. Gault, Mrs. E. A. Strang, Mrs. Robert Howell, Mrs. Ellis M. Fagan, Mrs. A. S. K. Kiser, Mrs. Bruce Macdonald, Miss Mary

**DRAPÉ SHAPE**  
Specialized in suits, strictly followed with a "drapé shape" the clothes are as suitable in Edmonston as on a Hollywood set. A black and white striped suit, tailored like a man's, is of great cool and fits snugly. A brown gabardine and soft green wool are also attractive with the full complement of perfect accessories: it, set them off. The mink gown, valued at \$800, is worn by Mrs. Ellis M. Logan. The mink skirt is balanced perfectly, there is no fault to be found in the wearer. The jacket and huge muff

**CLIMAX**

The climax of the show is the "dream" wedding gown with its nine-foot train. The heavy gold under a shiny layer of tulle shines in the lights.

The exotic gowns of the wedding attendants and the showgirls' extreme fashions for after-five are also being modeled.

Another outfit is one worn during a "dream" when the star visited the circus. The pleated skirt, blue and the merry blouse is of a rough lining, and the stage stars bring a quick memory of school days and sticky lollipops.

**PROCEEDS FOR CHARITY**

From the display of

the fabulous array of awards will be given entirely to the charities of the Junior Hospital League.

voluntary aid work as she said time for.

She said she has no interest in doing any "radio work, making speeches or writing for newspapers."

"I'd rather leave that to my husband," she said.

## Major and Minor Notes

By John Oliver

### On Holiday

IN THE YEARS immediately preceding the war, one of the sweetest and at the same time most popular tenors hereabouts was Joseph Rocks, a young Scotswoman, who, like a great many others, had come to carve out his career in the new world. Like

JOHN OLIVER in an integral part of the 1st Canadian Division, Rocks was among the first to join up. He had appeared with the Legionnaires' concert party, and had given liberally of his time and vocal ability to entertaining, but only returned soldiers, but deserving general community well-wishers. Therefore, it was not surprising when it became apparent that the war was to be protracted, and the armed services expanded and perfected their organization, providing entertainment for the men, that Rocks was one of the talented performers selected to contribute to the recreational and morale-sustaining phase of the war effort.

In the course of time, as bands were authorized in army establishments and the long training period in England wended its way laboriously along, and as the Canadian stood guard along the English Channel, while Britain equipped the mighty armies now striking pulverizing blows at the Huns, concert parties were formed. The 1st Canadian Division organized one known as the "Tin Hats," which has met with widespread success. Its travels have included a swing around Italy, logging in history where the music of Verdi, Puccini, Lehár, Rossini, Dinielti, and other popular heroes of the opera world hitherto have held almost sacred space.

In a letter written to his old friend Clement Schreier, Rocks gives a description of some of his experiences. "We are in Italy making a tour of the Canadian and Allied forces here," he writes. "The first few months were pretty hectic and raised H— with the army. The worst winter they have had in years, and playing shows under shell fire isn't just what the doctor ordered for Mrs. Rocks' boy."

"Now we are away from the front, and the old sun is out in all its glory. And we are billeted with the Yanks and sleeping in a hut. What more could one ask for or expect? We are living in the city for at least two weeks, and the morale has gone sky high. We are playing in one of the finest theatres in the world. Stand out in front of the audience of 2,000 and whisper, and your voice travels all over the hall. Sunday last we played in a theatre the same size as the San Carlo opera house, and it was one of the easiest places that I have ever sung in. One show last week netted us an audience of 8,000." Rocks mentions that while a show was in progress an attack was going on to the east of the city. The din and display reminded him of the fireworks at the night shows of the summer fair here.

Enthusiasm for the show has run high with the troops, as Rocks said that "it really does our hearts good to stand up there at the finale and listen to those boys cheer. Hurra the boys and we love it, and wouldn't mind having the same audience six nights a week. Tonight is our last show with the Yanks, and in 12 shows we have played to 50,000 men."

Tonight we play in a palace north of the city. For the rest of the week we will be playing to the British troops in the theatre where The Merry Widow is at present playing. Saw that show over at Bari and certainly enjoyed it. Have

PIANO, ORGAN, VOICE, VIOLIN, EXPRESSION, THEORY, GUITAR. Competent and Experienced Teachers. ALBERTA COLLEGE OF MUSIC Phone 21466. 10041 101 Street.

### GIRLS

"Have you the 'Blue Murder'?" "Well, yes, we have the book of the movie of the play of the book!"

## Charge Against Packing Firm Is Withdrawn

Allegations that C.I.O. union affiliates had been discriminated against by Canada Packers Ltd. were unreservedly withdrawn by C.I.O. officials appearing Thursday before the board of conciliation inquiring into a dispute between two rival unions seeking the bargaining rights for employees of the company's Edmonton plant.

The board completed hearing of evidence with briefs being submitted Thursday by the Canada Packers Ltd., and the Packing

Plant Employees Federal Union, Local 18, and affiliate of the Trades and Labor Congress of Canada. To DISCUSS EVIDENCE. Adjournment was ordered until July 5 when the evidence will be discussed by the members of the board, H. H. Parlee, K.C., chairman, L. Y. Cairns, K.C., representing the company, and Rev. C. J. Foran representing the United Packing House Workers of America, Local 243, an affiliate of the C.I.O.

In a communication addressed to the company by officers of the C.I.O. affiliate, produced in evidence at Thursday's session, charges against the company made during the hearing prior to the election at the plant were withdrawn.

The following is the text of the letter dated March 22, 1944, and addressed to S. F. McDougall, man-

ager of the Canada Packers Ltd., Edmonton plant. As stated in our letter of February 8th, 1944, we wish to repeat that U.P.W.A. Local 243 has no dispute with Canada Packers Limited. COMPANY NEUTRAL.

The executive officers and members of Local 243 are satisfied that to the utmost of its ability the company has followed a strictly neutral and impartial course throughout the unfortunate dispute between this local and Local 18 of Packing Plant Employees Federal Union.

The executive officers and members of Local 243 also wish to withdraw any statements made during the campaign which may reflect in any manner upon the good faith or integrity of the company and its officers.

This statement is made of our own free will, and because we

desire to remove any wrong impressions which might otherwise obtain as a result of statements made in bulletins, circulars or telegrams issued in Edmonton or sent to employees of Canada Packers in other centres.

We also withdraw the charge made in our application to the Dominion department of labor for the establishment of a board of conciliation and investigation that the company was at fault in refusing to recognize Local 243 as the exclusive bargaining agent of the company's Edmonton employees, realizing as we do that such recognition was barred by the Alberta Industrial Conciliation Act.

GAINED NO MAJORITY. In the brief submitted by the Trades and Labor Congress of Canada affiliate it was submitted that the C.I.O. affiliate had failed

on two occasions to win a majority vote of the workers affected and thereby under provincial and Dominion labor legislation the agreement between the company and its union should be maintained and the C.I.O. should be barred from participating in a further vote for the period stipulated in the legislation.

The brief, which was presented by Carl E. Berg, vice-president of the Trades and Labor Congress of Canada, also denied allegations made by officers of the C.I.O. affiliate.

He stressed that there was no quarrel between the Trades and Labor Council union and the company, adding that cordial relations had existed at all times in negotiations carried on between union officials and the company.

Jap Is Fined \$200 For Quitting Job. GOLDEN, B.C. June 30.—(CP)—On charges of infraction of B.C. Security Commission and Selective Service regulations, Yasuburo Iwada, 41, naturalized Japanese Canadian, was fined \$200 in police court yesterday by Magistrate A. W. Anderson. Iwada, employed by Rogers Lumber Co. Ltd., quit his job without permission of the Selective Service and travelled more than 50 miles allowed under B.C. security regulations without an R.C.M.P. permit. Iwada was fined \$100 on each charge. Iwada paid the fines.

Turtles do not shed their shells, but each sheds grows larger as the turtle's size increases.

# INVASION MAKES MORE URGENT THE SAVING OF GAS!

## A Message to Canadian Motorists

THE invasion of Europe has thrown a vast and critical burden upon the petroleum resources of the United Nations.

In the first eight days of the campaign alone Allied aircraft flew 56,000 sorties. Many thousands of oil-burning warships and landing barges are shuttling ceaselessly across the Channel. Tanks, trucks, jeeps, mobile artillery, tractors, ambulances, by the thousands, are in action.

The driving power behind all this activity is petroleum—gasoline and fuels drawn from a dwindling crude oil supply. But—there is only so much oil. If existing supplies are to prove adequate, the most stringent economy of gasoline and fuel oil must be practised here at home.

Canada is able to produce only 15% of her own gas and oil needs. The remainder must be imported from the common pool of the United Nations and the bulk of this is shipped here by tankers. Critical manpower is needed to produce our gasoline and oil. Precious lives and precious ships must be risked to deliver it to our shores.

Invasion, and the difficulties of supply and transportation are not our only problems. Right here in Canada gas and oil are needed in enormous quantities for vital war purposes. The Commonwealth Air Training Plan has consumed as much as

548,000 gallons in a single day. Canada's Navy—expanded since war began from 15 ships to 650—consumes over 2,150,000 gallons every week. Army training, war plant operation, food production, essential trucking—all are huge consumers of gasoline and petroleum products.

Gasoline is ammunition—ammunition of which we have all too little. To waste a gallon of it is a crime against our fighting men.

The "whys" and "wherefores" of the gasoline shortage and the need for rationing of all petroleum products is a long story—a big story, which involves almost astronomical figures—a wide story, covering the whole face of the earth. Some of the facts are military secrets. Some are too technical to be easily explained. But in a series of announcements, of which this is the first, an attempt will be made to show Canadian civilians that the needless use of a single gallon of gasoline robs the common petroleum pool of the Allied Nations and thus lessens the power of our united drive for victory.

LESS CIVILIAN GAS MEANS MORE "FIGHTING GAS" FOR THE FORCES

NO. 1 OF A SERIES OF ANNOUNCEMENTS ISSUED BY THE DEPARTMENT OF MUNITIONS AND SUPPLY, HONOURABLE C. D. HOWE, MINISTER

Answering Your Questions about the Gasoline Shortage

How much gasoline was consumed during the 54 days of pre-invasion bombing? . . . More than 200,000,000 gallons.  
How much fuel oil does a battleship take in one refueling? . . . Enough to heat an average house for 350 years.  
How much fuel does one armoured division consume in every five miles of advance? . . . 10,000 gallons.  
How many gallons of petroleum products are required to supply the needs of 500,000 European invasion troops for a week? . . . Over 25,000,000 gallons.

## Legal Notices

## Sale by Public Tender of Petroleum and Natural Gas Reservations

**PUBLIC NOTICE IS HEREBY GIVEN** that the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta, will offer for sale by public tender at 2 o'clock in the afternoon on Tuesday, the 3rd day of July, 1944, at Room 602, Administration Building, Edmonton, Alberta, a reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

**DESCRIPTION**  
The North halves of Sections 24, 25 and 26 of the Fourth Township, Range 1, T. 4, S. 20, W. 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, West of the Fourth Township, containing an area of 820 acres.

The tender shall be a percentage of the products other than natural gas obtained from any of the lands so described and may be enclosed in a sealed container and may be handed to the person conducting the sale, or may be forwarded by mail addressed to the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta.

The tender must be accompanied by the cash deposit of \$250.00, which shall be held in the possession of the officer in charge of the holding of the sale, and shall be returned to the tenderer if the tender is not accepted. The tender must also be accompanied by a check for the amount of \$250.00, which shall be held in the possession of the officer in charge of the holding of the sale, and shall be returned to the tenderer if the tender is not accepted.

The payment accompanying the tender must be in the form of cash, or by cheque payable to the order of the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta.

The person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

## Sale by Public Tender of Petroleum and Natural Gas Reservations

**PUBLIC NOTICE IS HEREBY GIVEN** that the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta, will offer for sale by public tender at 2 o'clock in the afternoon on Wednesday, the 12th day of July, 1944, at Room 602, Administration Building, Edmonton, Alberta, a reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

**DESCRIPTION**  
Section 4 and 8, East half and West half of Section 24, Range 1, T. 4, S. 20, W. 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, West of the Fourth Township, containing an area of 1440 acres.

The tender shall be a percentage of the products other than natural gas obtained from any of the lands so described and may be enclosed in a sealed container and may be handed to the person conducting the sale, or may be forwarded by mail addressed to the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta.

The tender must be accompanied by the cash deposit of \$250.00, which shall be held in the possession of the officer in charge of the holding of the sale, and shall be returned to the tenderer if the tender is not accepted. The tender must also be accompanied by a check for the amount of \$250.00, which shall be held in the possession of the officer in charge of the holding of the sale, and shall be returned to the tenderer if the tender is not accepted.

The payment accompanying the tender must be in the form of cash, or by cheque payable to the order of the Deputy Minister, Department of Lands and Mines, Edmonton, Alberta.

The person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

The reservation shall be awarded to the person who tendered the highest bid, and who is not disqualified, shall be awarded the reservation of the petroleum and natural gas rights in the lands hereinafter described for investigation of the Sub-area Geology by methods used in drilling Wells for the Production of Oil.

## No Plans Made For Settlement Of North Areas

**OTTAWA, June 30.—(CP)—**Officials of the resources department said yesterday that many federal government parties now are conducting surveys in North-western Canada, but they know of no plans for the settling up of a drilling Wells for the Production of Oil.

The parties are working in areas opened up by the Alaska highway and in other parts of the northwest and are surveying all possibilities of developing the area, said the officials.

**COMMITTEE ON REPORT**  
They were commenting on an Edmonton dispatch which quoted Maj. Gen. W. Foster, special commissioner for defence police, as having been very busy in an interview Tuesday that the Dominion government was setting up a special committee to go into the northwest area immediately to survey settling of the area.

Gen. Foster also was quoted as saying the commission would advise the government on the possibility of health facilities for people settling in the area.

The committee would be very aware of any plans being made by such a commission. However, they would like to see the government wished to convey was misunderstood. They said the survey now being done by the various parties would likely serve the government in any plan for settling of the area or for providing educational and health facilities for the people who do settle in the northwest.

**WINNIPEG, June 30.—Prospects for a heavy-yielding crop continue good as grain enters the critical stage of heading out and filling.**

Cool, rainy weather has prevailed and crops in some low lying areas are showing the effect of excessive moisture, according to the weekly crop report of the department of agriculture of the Canadian National Railways.

Warm weather is now a necessity to permit crops to take full advantage of the moisture. However, it is reported that crops so far are expected to make an excellent yield. Cereals and corn are well along in the growing stage, but it is not widespread or serious.

**LIGHT RAINS DAILY**  
In southern Manitoba, weather has been cool with light rain almost daily. Some low lying areas are suffering from too much rain but the loss will be more than offset by improved conditions of all crops on higher ground. Rain is heading out and what is well along in the growing stage. Other than too much rain, no damage is reported.

Throughout south-central Alberta, crop conditions vary considerably. In the eastern sections, moisture is lacking and crops are growing slowly and are patchy. In the western and northern sections, crops are growing well and are producing a decent crop. In the southern sections, crops are growing well and are producing a decent crop.

Throughout the whole of Alberta, crop conditions are excellent and prospects are good.

## Negro Is Given Death Sentence

**WASHINGTON, June 30.—AP—**A Negro handyman, Julius Fisher, 31, was convicted last yesterday of first degree murder in the Washington, D.C., police station in the Washington Cathedral library slaying of Miss Catherine Cooper Hearn, 31, last March. The conviction carried a mandatory death penalty.

**No Favorites!**  
Vancouver, June 30.—(CP)—Father Boniface of St. Francis Xavier's parish in Vancouver, B.C., has appealed a petition in favor of a plan to build a private school, produced a counter petition. A. J. Harrison, board secretary, produced a counter petition. A. J. Harrison, board secretary, produced a counter petition. A. J. Harrison, board secretary, produced a counter petition.

**Octopuses Hunt Food at Night**  
Octopuses hunt food at night, taking advantage of the darkness to catch their prey.

**REPORT FINDINGS**  
Findings of the committee will be reported to the association executive which will then seek action on the matter.

A proposal by Chief of Police E. Knight, London, for the adoption of police officers more generally in police departments across Canada, drew the comment from Sir Gen. D. C. Draper, Toronto chief of police, that he had found the use of police officers in Toronto to be most satisfactory and could recommend such a step being taken elsewhere.

Chief J. A. McDonald, Kingston, Ont., asked that action be taken to prevent the sale of old gold to the mint which, he said, were now made directly on request of the gold by a dealer, leaving a quick way of disposing of stolen gold. It was suggested that the mint should be required to accept gold for 15-day period before acceptance by the mint.

Setting up of the commission was announced by Munitions Minister Howe last March 27 and the matter has been under consideration since that time.

The details said the terms of reference have been drafted, but have to be dealt with by the cabinet before formation of the committee is announced.

Mr. Howe said the Commission would be made up of representatives of the military and police, and would be charged with the task of recommending a step being taken elsewhere.

## Conserve and Protect

### Proper Pruning Essential To A Successful Berry Harvest

Diagram illustrates proper summer pruning of bramble fruits.

Summer pruning of berry bushes is an important phase of their culture. Raspberries and blackberries should be given certain pruning at this time to keep them within bounds and to induce better development of the new growth. It must be remembered that this year's berries are borne on canes (thornless) which started last year. After fruiting these branches die and must be cut off at the ground to make room for new growth which will produce next year's crop.

The tip growth of this year's canes of black raspberries is pinched or cut off when the canes have reached a height of two feet. Purple raspberry and blackberry tip growth is not pinched off until the new canes are between 30 and 36 inches tall. Pinching back 3 to 4 inches of the new growth causes several branches to develop and results in a low, stocky plant which will require no support by wire trellis. Do not pinch back new growth on red raspberries; to do so will result in weak laterals, poor berries and canes that are susceptible to winter kill.

Fruit growers remove all old canes soon after the berries are picked. They use long-handled shears and cut down to the ground. Many varieties are over-prone in the production of new growth and all but five or six of the best canes should be cut to the ground.

Youngberry and boysenberry canes are treated as you would blackberries and as soon as the old

canes have fruited, they are cut off and burned.

Raspberries require little or no pruning for the first three years. The type of pruning depends upon their character of growth. Only summer pruning necessary is the removal of shoots which develop after the middle of the growing season. These are usually weak and have few fruit buds.

Currents and gooseberries are pruned in late winter or early spring. Two- and three-year-old wood are the most productive. Pruning of these berries comprises the removal of old canes to keep the bushes producing mostly on young wood.

All berries, unless unusually vigorous and healthy, will appreciate a feeding at this time. A half cup of Victory Garden fertilizer works well into the ground about each plant is recommended. Water is especially necessary while fruit is developing and ripening.

Berries are subject to curl, mosaic, virus and other diseases. Infection and spread can be controlled by digging up and burning all infected plants as soon as detected, and removing and burning all pruned canes and cuttings. No summer spraying is advised for raspberries and blackberries. Gooseberries and currants may be sprayed with Bordeaux mixture, 1% solution, after the berries have ripened.

### U.S. Troops Fight Hard For Small Gains on Saipan

PEARL HARBOR, June 30.—(AP)—American troops have fought their way to small gains on the main fighting line across Saipan, and wiped out resistance by isolated Japanese on Nafutan Point at the southeastern tip of the island. United States Pacific fleet headquarters announced yesterday.

The communiqué said the Americans occupied all of Nafutan Point. Cleaning up this pocket completed the conquest of about half of Saipan's 72 square miles within two weeks of fighting.

Conquest of an enemy stronghold northeast of Mount Tapochau would assure the fall of Garapan, capital of the Marianas, and force the Japanese to retire into northern sector of Saipan, representing the combined American press.

### Care of Roses Should Be Regular, Not Spasmodic

The summer care of roses, aside from spraying or dusting to ward off insects and diseases, may be condensed into two words—regularity. The old gardener declares that if the soil is kept loose and the roses are watered, practically nothing else is required. His rose garden receives water only when the rains come and consequently, so he claims, little black spot or mildew is ever present. However, he does dust regularly with a mixture containing rotenone and sulfur. The dusting is done in the evening when the air is calm, before the dew comes and a frequent intervals, generally about once a week.

There are many good rose dusts and sprays on the market. The so-called Massey dust, consisting of nine parts colloidal sulfur and one part lead arsenate, is excellent. All dusting or spraying should cover both sides of the leaves since several insects work only on the underside of the foliage. Among the worst enemies is the rose chaffer. Killing him is difficult but frequent dusting plus some hot picking will discourage him. The same may be said of the rose sawfly. The rose sawfly is common throughout the northeastern states. Aphids are best controlled by spraying with nicotine sulfate soapy water spray applied directly on them and only when

they are present. No other poison seems to affect them. Aphids are tiny sucking insects who congregate mainly about the buds and on the tip growth. Use a solution of nicotine-sulfate (Black Leaf 40) to control them.

Many gardeners prefer to mulch the soil about their roses. Mulches must be porous to allow rain water and air to pass through and permanent enough not to wash or blow away. The soil should be fertilized and well cultivated before a mulch is applied. An inch layer of buckwheat hulls are the ideal mulch, since they are always loose and, strangely enough, they do not blow away. Weekly feeding during the period of budding and blooming may be in the form of liquid manure or fertilizer about each plant and working it into the soil. Liquid fertilizer is recommended when the roses are in bloom.

Disbudding of hybrid tea roses is best done when the first flower buds appear. Usually three or more buds form on each stem. If the side buds are pinched out, the remaining bud will develop into a much finer flower. Disbudding also tends to produce a more compact bush and finer flower lines throughout the season.

Rose care is simpler than it sounds. The answer is to care for them regularly, not spasmodically.

### "Square" Plan Gives House Very Economical Arrangement

Here is a sensible solution to the problem of a small house one that embodies economy and yet sacrifices nothing in arrangement. Economy springs first from the fact that the plan is almost perfectly square.

Secondly, that there is no waste of space. The kitchen and bathroom are so arranged that plumbing is back to back. Containing two bedrooms, living room, dining room, bathroom, kitchen, and a small front porch, this house is attractive in its extreme simplicity and its avoidance of all artificial ornamentation. Any builder or architect could duplicate this plan.

The cellar stairs to the basement are accessible to the main entrance.

### Insulate Hot Water Tank During Summer

While many householders get at least a sort of by-product of their central heating system, in summer every drop of water used in the house must be heated especially and householders should insulate hot water tanks now.

Thus, while the escape of valuable heat is just as great—probably greater—in the winter, it is only during the warm weather months when the fire is out and the householder has to use extra fuel for all his hot water that he becomes conscious of the need for heat conservation in his hot water tank. Fortunately though, this time of year is the best time for having any plumbing or steamfitting work done as plumbers are not burdened with emergency repairs to heating plants as is the case during much of the winter.

So get an estimate on the cost of insulating your hot water tank and, while you're at it, have the estimate include the cost of insulating the hot pipes of your heating system too. Next winter, when the fuel bills are up for consideration, you'll be glad you did.

And, if your plumber offers suggestions for repairing or replacing plumbing or heating items, now is the time to get him to it.

It never rains in Northern Chite. But the intensive rich nitrate deposits there.

### U.K. Information Ministry Attacked

LONDON, June 30.—(CP)—The House of Commons yesterday heard an attack on the Ministry of Information, which Secretary Basil Bracken, Canadian-born Conservative M.P., said "from the beginning was born in sin" after Brendan Bracken, information minister, had defended his department.

Mr. Baxter, a former editor of the London Daily Express, proposed that after the war an inspection over the doors of the Ministry of Information, new knowledge by the ministry, be made to read: "Here dwelt the harlot profligate, New here dwell knowledge and eternal truths."

Mr. Bracken, listing some of his organization's accomplishments, said French language films already were being sent to France. He said B.A.F. and Allied airmen were dropping 25,000,000 leaflets monthly over France, Belgium, the Netherlands, Denmark, Norway and Germany.

### BE SAFE! INSTALL DUPLATE SAFETY GLASS CAPITAL GLASS WORKS, LTD. 8812 Jasper Ave. Phone 2243

### Probe Disposal R.C.A.F. Property

VICTORIA, June 30.—(CP)—R.C.A.F. equipment, including leaf, proof airplane gasoline tanks, several hydraulic jacks, electrical supply, canvas engine covers and other aircraft parts and supplies with an aggregate value of \$2,000 have been located in the possession of a civilian in Sidney, a western air command spokesman said yesterday.

The official said the air force material had been seized while action is pending against the civilian involved. R.C.A.F. Provost officers, who said there was no evidence of a conspiracy to defraud the government, are pushing investigations to locate the servicemen involved.

The equipment was taken from stock piles of obsolete material destined to be sold as scrap. The air force believes the material was illegally sold to a member of the air force to the civilians at scrap and it is possible the civilians were not aware that they had bought the supplies illegally.

### Given New Post

OTTAWA, June 30.—(CP)—J. Earl Lawson of Toronto, representing the Canadian Red Cross Society, was yesterday appointed provisional chairman of the executive committee, council of Canadian voluntary agencies, at a meeting here. The committee will assist the United Nations Relief and Rehabilitation Administration.

### C.C.F. Protests Lap Vote Ban

VANCOUVER, June 30.—(CP)—A House of Commons bill that the "immediate effect of disfranchising citizens of Japanese origin throughout Canada" has been protested by the British Columbia section of the C.C.F. party. F. J. McKenzie, provincial secretary, announced last night.

On the instructions of the provincial executive of the party, Mr. McKenzie Wednesday sent a wire to Prime Minister King protesting house bill No. 135 which the executive felt to be unfair and discriminatory. Mr. McKenzie said.

"We have read with regret the terms of bill No. 135, clause 5, the telegram read, 'Believe it is insulting to Canadian citizens and members of the armed forces of democracy and would injure Canadian unity in the war effort.'

"It is immediate effect of disfranchising citizens of Japanese origin throughout Canada resembles racial persecution against which the United Nations wage war. Urge your full influence to prevent passage of a measure we deem harmful to the war effort and future world peace."

### German Claim

LONDON, June 30.—(CP)—The Berlin radio, broadcasting what it said was a dispatch from Paris, asserted yesterday that residents of the French capital attempted to burn American prisoners as they were marched through the streets.

### Hengyang Aflame After Air Attack

CHANGING, June 30.—(AP)—Encircled Hengyang has been bombed by American planes and left aflame after abandonment of the American airbase nearby, it was disclosed last night by an American communiqué which referred to the vital Hunan Province railway junction as a "Japanese stronghold."

A Chinese communiqué at the same time declared the city itself still held by the Chinese and a subsequent communiqué early yesterday reported the Chinese had scored their first success in Hunan in weeks by recapturing

### Professor Dies

HALIFAX, June 30.—(CP)—The body of Professor W. J. Alexander, emeritus professor of English at the University of Toronto, was found by searchers in west end Halifax yesterday. He had apparently died of a heart attack while returning from a walk.

The Royal Canadian Air Force has increased more than 30-fold from its pre-war nucleus of 1,000.

### Choosing Insurance . . .

### A Job For Specialists

IT is difficult for a layman to choose insurance that will completely cover all risks, without gaps and without overlapping, even when he knows precisely what those risks are. The misinterpretation of a clause or the wrong choice of a policy could lead to serious loss should claims arise.

We, as specialists in the purchase of insurance for our clients, are proud of the service we are rendering. After many years of scrutinizing policies and weighing their relative merits, we are able not only to cover specified risks fully and precisely, but also to perform this service with a very minimum in premium costs to our clients.

But this is not the full extent of our service, for we also supervise evaluation and collection of claims. This is insurance brokerage at its best—and it is the kind we offer you, both for personal needs and business protection.

### MODERNIZE YOUR FIRE INSURANCE

A—Get out your present Fire Insurance Policies.

B—Check up to see if they protect you against loss or damage by Falling Aircrafts, Explosion, Hail, Windstorm, Vehicles, Smoke, and Riot as well as Fire and Lightning. Also see that the amount of insurance is sufficient to reimburse you fully at today's values.

C—If not, phone immediately and ask us "How little will it cost to add extended coverage (supplemental contract)?"

**To Our CUSTOMERS**

The full capacity of our plant is being taken on War Work. Until late in the summer or early fall we will be unable to supply Ready-Mix Concrete.

We trust our customers will understand our difficulty.

THANKS
